Nathan Davis/Day Porter OBE. Mr. Nate for being the one to come read to Kindergarteners.

Chrita Helms/Area Manager

Chemical Safety

Moment for Safety

ABM[®]
Building Value

Chemical Safety Reminders

- All chemicals must be properly labeled (1)
- Have updated SDS sheets for all chemicals (2)
- Ensure chemicals have been approved for use
- All employees shall be trained how to use each chemical (3)

Chemical (Disinfectant) Fogging

- Each area manager has access to a disinfectant fogger in case of an outbreak of flu or any other applicable virus. We use Virex II 256 which is a Diversity Product along with other chemicals that are used during our daily cleaning routine. Virex II 256 is a one step Disinfectant cleaner and Deodorant, Bactericidal, Viricidal, Fungicidal, Mildewcidal and Deodorizer. Additional wipe down of high touch points is also used as a means to curb outbreaks. J-Fill dispensers are used to regulate the amount of product that is used in spray bottles or foggers.

Grounds Maintenance

- On going grass cutting, edging, weed eating, hedge trimming.
- Chemical Application (weed kill).
- Continue to work on holding ponds
- Fence row trimming
- Trim low hanging limbs, time permitting.
- Grounds personnel (Ruben Brand, Robert Ard and Will Saterfield)

Thank you
