Re: Elkhart K-8 Covered Play Area Delays

(888) 319-9256 Wats

Sandie,
At Elkhart, AEN experienced construction delays due to both PEMB issues and excessive rain.

(850) 472-1004 Fax

Early on, AEN entered into a subcontract with a Vulcan Steel qualified erector. AEN kept the erector informed of weekly progress. In the two weeks before scheduled to arrive, the erector began a series of delays to his own schedule due to COVID related personnel shortages. Finally, on the week of August 8, 2021. AEN was forced to proceed with the erection of the PEMB with its own forces.

Construction Management

On the week of August 15m 2021, AEN notified Vulcan Steel of order shortages of both structural components and trim materials. The missing structural components required completion prior to final painting and roof panel installation. These components arrived twenty-four (24) days after notification.

Construction Scheduling

Project Management

Progress resumed with the PEMB erection the week of September 12, 2021. Roof panel installation began the week of September 19, 2021.

On Monday, September 27, 2021, AEN notified Vulcan Steel of an additional shortage of 160 panel clips required for roof panel installation. These clips were needed to complete the installation of the roof panels at the north occupied end of the structure. These clips arrived five (5) days later on the afternoon of October 1, 2021 and were delivered to the site the following day.

AL 20733

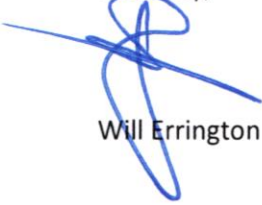

During the week of October 3, 2021, the site experienced over 13" of rain over five (5) days. The DAG field report of October 8, 2021 made the observations of "a lot of rain last week / building wet / CMU too wet to paint". Roof panels were completed; AEN installation heaters and fans in an attempt to dry the facility. On October 18, 2021 painter still not able to paint. By Monday, October 25, 2021 walls were finally sufficiently dry to allow for paint and epoxy finishes to begin. Basically the rain starting October 21, 2021 created an overall rain delay of twenty-three days (AEN has already under separate cover requested eight (8) days of excessive rain.)

Elkhart K-8 Covered Play Area Delays
Page 2

Getting back to Vulcan Structures, a portion of the missing items and the entire trim package came from their second tire supplier, MBCI. Again, as explained by Vulcan Structures, this delay was caused by COVED related personnel shortage in their fabrication plant.

AEN respectfully requests a meeting with DAG and / or the SRCSD to discuss additional days to be added to the contract for these delays. Advise, thanks.

Sincerely,

A handwritten signature in blue ink, appearing to be "Will Errington", written over the word "Sincerely,".

Ref: Vulcan Steel Structures Manufacturing Delays
Vulcan Order 27092R1/A. E. New, JR. INC

January 25, 2022

Over the past year, Vulcan has had to delay the shipments of our materials due to a number of unforeseen manufacturing conditions as listed below:

Steel Vendors not delivering product to our plant on a timely manner due to shortages and allocations in the industry.

Covid running rampant throughout the plant on many occasions and departments.

Workers quitting work to stay at home in order to receive Government Checks.

Massive increase in demand for steel buildings in order to beat the escalating Steel Price Increases.

We have found these same conditions to be the same for almost every industry in the US.

Its been an uncontrollable year for everyone I'm sure.

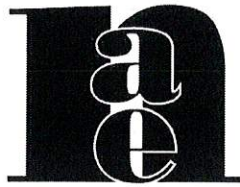

Chuck Sheldt, District Manager

East Bay K-8 Covered Play Area
Weather Delay Log, October, 2021

Pensacola, FL 32505

(850) 472-1001 Phone

(888) 319-9256 Wats

(850) 472-1004 Fax

We experienced delays to the roof installation, sidewalks and interior finishes. These delays were due to adverse weather conditions. The site experienced 8 days of rain over .10"; including 1 day over 2", 1 days over 4" and 1 day over 6". There was a total of approximately 14" of rain in a 5-day period. This amount of rain kept the building from drying out and interior finishes to begin on schedule. Based on the weather data, there was an excessive amount of rain over several days (over 13" in 1 week). Based on this, we are requesting 12 days be recognized for the adverse weather.

According to the attached average number of rain days anticipated for the month of October is 4 days. We request an additional 8 days of time be added to our contract time for adverse weather.
