Attached you will find the **District Florida School Security Assessment Tool (FSSAT)** with compiled information from all the District Schools. Before I can submit the final copy to the state, I will need any input the board has for section 10 .3.1 found on page 49:

Approved as presented
Approved with comments (attach or provide comments)
Postponed
Other (explain in comments)

I must then report to the Office of Safe Schools that this report has been presented to the School Board by 1 November.

Other attachments are the **FSSAT Rollup**, where I took data from chapter 7 of each school's report and put them on a single document. My assessment of their needs and how to spend grant money in section 2.1.3 starting on page 5 of the District FSSAT. Schools are listed in alphabetical order.

In the **FSSAT upgrades** document I created a cumulative document showing what has been accomplished in school in the last year.

I also created, but did not attach, a Tech Request document at the request of David Hicks showing what tech each school has requested, all of which is captured in the **FSSAT Rollup** under section 7.7.1
