Dear Mrs. West,

Thank you for meeting with the representatives of the Haas Center IT team on Thursday, May 4th, 2017. Please find below the UWF Haas Center proposal for the development of the advanced reporting functions for the Professional Educators Assessment and Results System (PEARS). Our proposal outlines the project's scope of services, including a project description, timeline and projected costs.

Scope of Services

Project Description

The Santa Rosa County School District (SRCSD) is in need of advanced reporting functions integrated into PEARS that will allow the District to perform advanced data analytics for district-wide calibration and information gain. The following are a list of criteria that the new reporting function must meet:

- The reporting function should provide district level and site level information regarding number of average marks per administrator for the FEAPS and FPLS assessments
- SRCSD also needs district wide and site level information regarding number of average marks per FEAPS/FPLS criterion
- The reporting function needs to be run at multiple times throughout the year to provide the best information value to SRCSD for use in district and site level calibration
- The reporting function needs to provide SRCSD the ability to access information that is organized in a manner that can easily be sorted and filtered. The reports need to be accessible in both electronic and printed format

This project requires Haas Center services in database design and PEARS development as outlined below.

- The Haas IT and PEARS team will work closely with SRCSD to develop detailed queries to produce the desired information from the PEARS database
- A custom user interface will be developed to allow SRCSD to interact with the queries on demand in a manner that is organized and efficient.
- The reporting function will allow SRCSD users to view information both electronically and in printed format

Timeline

The Haas Center proposes to complete the project within four stages. Each stage and estimated time of completion is outlined below:

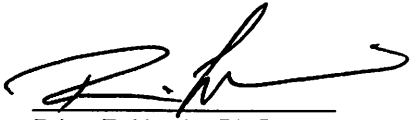

Stage of Project	Weeks to Complete
Stage 1: Requirements gathering and analysis	2 – 3 days
Stage 2: Database development and query creation	2 - 3 weeks
Stage 3: System coding and user interface development	1 - 2 weeks
